

Front-End Developer

Favour Abangwu

Objective

I strive to create visually appealing interfaces with that provide seamless user experiences. With proficiency in ReactJS and Tailwind CSS, I am dedicated to delivery high-quality work and innovative solutions.

Experience & Projects

January 2023 - Current

Frontend Developer *RunAm Technologies*

- Collaborated and coordinated with 5+ developers and designers to build a full-stack e-commerce web application
- Created a suite of custom web pages that boosted client engagement and revenue generation
- Boosted user satisfaction and engagement by implementing performance-enhancing techniques and rigorous testing with React and React testing library

Strive Project Management System *ALX Project*

- Leveraged React libraries and frameworks to design and develop a highly scalable and performant single page application
- Optimized worktime efficiency to 90% percentage by integrating CI/CD using git
- Implemented React Drag and Drop library for drag and drop functionality, resulting in a more streamlined and intuitive user interface
- Ensured a flawless and highly polished user interface through pixel-perfect and responsive implementation of the design
